ITU 12LF is a problem-free version of 12LF. One can expect to see additional functionality without any downfalls, but also with a few features missing. It has its strengths and weaknesses. The "Patch tool" has been removed and there is no support for the SCORM-compliant export of 11LF to any program. However, there is a method of exporting the augmented 11LF to.pps files. See notes on the 11LF to.pps Export at the bottom of this section for information on using this method. The two dialogs (Variant Selection, Base Editing) have been altered. The Web Interface has been modified and is now a bit more in line with the rest of Mastercam. "Quick paths" have been eliminated and you can no longer access the Quick Export Dialog with a single click. An exciting enhancement that will help you build an

interior space - particularly in the case of residential work - is the ability to analyze the properties of the walls, ceilings and flooring that form the room. Mastercam Analytics is used for comparing a planned design with a room that you have built with the previous tools. Mastercam Analytics is an upgrade to the room analysis feature in Mastercam 11LF. A short video and some pictures can illustrate the power of this tool: You can learn more about this program from the detailed information on the Mastercam Software Download page of the ITU 12LF release. What's new in Mastercam 12LF? If you want to know all about the many new features in Mastercam 12LF, check out the Review of Version 11LF. If you are reading this review after purchasing your copy of 12LF, you can find the Review of Version 11LF here. 11LF to.pps Export The purpose of this section is to provide you with the information needed to transfer your 11LF project to a format that any program can open. The process works by exporting your design directly to.ppt or.pps files. For this method to work, you must have the latest release of Mastercam installed on your computer.
